Declaration of PPWR Compliance

Dear Valued Customer,

Cincon Electronics Co., Ltd. hereby certifies that, based on the feedback from our suppliers, our products shipping to the EU territory comply with Regulation (EU) 2025/40 on packaging and packaging waste (PPWR) of the European Union.

This compliance declaration refers exclusively to the product-specific original primary packaging materials. Secondary and/or tertiary packaging materials utilized within the supply chain may vary depending on the mode of transport and are not always under our direct control; therefore, they are excluded from this compliance declaration.

The original primary packaging of the declared device complies with the essential requirements concerning composition, recyclability, reusability, and the minimization of environmental impact as defined in the Regulation. Furthermore, the concentration levels of heavy metals (lead, cadmium, mercury, and hexavalent chromium) in the packaging materials do not exceed the permitted threshold values specified in Article 5 of the Regulation.

Measures have been implemented to support the reuse, recycling, and environmentally sound management of packaging waste in accordance with the obligations of the Regulation. In response to the tightening of environmental regulations, Cincon will continuously monitor regulatory updates and improve our packaging practices to align with global sustainability goals.
