## CFM12S Series

## Application Note V16

## 1. Introduction

This application note describes the features and functions of Cincon's CFM12S series of open frame, switching AC-DC power module. These are highly efficient, reliable, compact, high power density, single output AC/DC power modules. The module is fully protected against short circuit and over-voltage conditions. Cincon's world class automated manufacturing methods, together with an extensive testing and qualification program, ensure that the CFM12S series power module is extremely reliable.

## 2. Electrical Block Diagram

## Application Note V16

## 3. Main Features and Functions

### 3.1 Operating Temperature Range

The highly efficient design of Cincon's CFM12S series power modules has resulted in their ability to operate within ambient temperature environments from $-40^{\circ} \mathrm{C}$ to $75^{\circ} \mathrm{C}$. Due consideration must be given to the de-rating curves when ascertaining the maximum power that can be drawn from the module. The maximum power which can be drawn is influenced by a number of factors, such as:

- Input voltage range
- Permissible output load (per derating curve)

### 3.2 Output Protection

The power modules provide full continuous short-circuit protection. The unit will auto recover once the short circuit is removed. To provide protection in a fault condition, the unit is equipped with internal over-current protection. The unit will operate normally once the fault condition is removed. The power module will go to hiccup mode if the output current is set from $110 \%$ to $180 \%$ of rated current.

## 4. Applications

### 4.1 Test Set-Up

The basic test set-up to measure parameters such as efficiency and load regulation is shown in Figure 1. When testing the Cincon's CFM12S series under any transient conditions, please ensure that the transient response of the source is sufficient to power the equipment under test. We can calculate the

- Efficiency
- Load regulation and line regulation

The value of efficiency is defined as:

$$
\eta=\frac{V o \times I o}{\text { Pin }} \times 100 \%
$$

Where:
Vo is output voltage
lo is output current
Pin is input power
The value of load regulation is defined as:

$$
\text { Load reg. }=\frac{V F L-V N L}{V N L} \times 100 \%
$$

Where:
$V_{\text {FL }}$ is the output voltage at $100 \%$ full load
$V_{N L}$ is the output voltage at $10 \%$ load
The value of line regulation is defined as:
Line reg. $=\frac{V_{H L}-V_{L L}}{V_{L L}} \times 100 \%$
Where:
$\mathrm{V}_{\mathrm{HL}}$ is the output voltage of maximum input voltage at $100 \%$ full load
$V_{L L}$ is the output voltage of minimum input voltage at $100 \%$ full load.

Figure 1. CFM12S Series Test Setup

### 4.2 Output Ripple and Noise Measurement

The test set-up for noise and ripple measurements is shown in Figure 2 Measured method:
Add a C2 $=0.1$ uF ceramic capacitor and a C1 $=10$ uF electrolytic capacitor to output at 20 MHz Band Width.

Figure 2. Output Voltage Ripple and Noise Measurement Set-Up

CFM12S Series

## Application Note V16

### 4.3 Installation Instruction

The CFM12SXXX-T has four 3.5 mm diameter mounting holes. Please use the mounting holes as follows:
Insert the spacer ( 6 mm diameter max.) of 8 mm height or more to mount the unit. The vibration specification applies when the unit is mounted on 8 mm spacers. Please allow 4 mm side clearance from the components and all side of the PCB. Allow 5 mm clearance above the highest parts on the PCB. Be especially careful to allow 8 mm between the solder side of the PCB and the mounting surface. If the clearances are not sufficient, the specifications for isolation and withstand will not be valid.

The CFM12SXXX and CFM12SXXX-E mounting holes are 1.5 mm . Please allow 4 mm side clearance from the components and all side of the PCB and CASE. Allow 5 mm clearance above the highest parts on the PCB and CASE.

## 5. Packing Information

The packing information for CFM12SXXX series is showing as follows:
(8)

(4)

| ITEM | PART NO. | NAME | OUTSIDE DIM | PCS |
| :---: | :---: | :---: | :---: | :---: |
| 1 | - | CFM12SXXX Product | $38.1 \times 25.4 \times 19.2 \mathrm{~mm}$ | 200 |
| 2 | G64304163 | Inner Box | $76 \times 66 \times 35 \mathrm{~mm}$ | 100 |
| 3 | G64301177 | Antistatic Foam | $75 \times 65 \times 15 \mathrm{~mm}$ | 100 |
| 4 | G64308311 | Antistatic Foam | $75 \times 65 \times 10 \mathrm{~mm}$ | 100 |
| 5 | G64301178 | Antistatic Foam | $65 \times 10 \times 10 \mathrm{~mm}$ | 100 |
| 6 | G64U10075 | Partition | $326 \times 200 \times 6 \mathrm{~mm}$ | 3 |
| 7 | G64301114 | Antistatic Foam | $326 \times 200 \times 25 \mathrm{~mm}$ | 2 |
| 8 | G64301113 | Antistatic Foam | $373 \times 200 \times 25 \mathrm{~mm}$ | 2 |
| 9 | G64114346 | No.148 Cardboard Box | $393 \times 385 \times 220 \mathrm{~mm}$ | 1 |

Each Box Packaging 200PCS Products
Gross weight Ref. 4.5 kg
CFM12SXXX 200pcs a box, including the total weight of package material about 4.5 Kg The packing information for CFM12SXXX-E series is showing as follows:

Packaging 17PCS Products
in the Antistatic PVC Tube

| ITEM | PART NO. | NAME | OUTSIDE DIM(mm) | PCS |
| :---: | :---: | :---: | :---: | :---: |
| 1 | - | CFM12SXXX-EProduct | $40.64^{*} 27.94^{* 19.6}$ | 170 |
| 2 | G64910942 | Antistatic PVC Tube | $43.6^{*} 29.1^{*} 535$ | 10 |
| 3 | - | Tube Nail | - | 20 |
| 4 | G64301154 | Antistatic Foam | $535^{* 150 * 10}$ | 2 |
| 5 | G64203214 | No.14 Inner Cardboard Box | $548.4^{*} 121.2^{* 166.7}$ | 1 |
| 6 | G64112338 | No.14 Cardboard Box | $590.9^{* 148.5 * 193.9 ~}$ | 1 |

Each Box Packaging 170PCS Products
Gross weight Ref. 9.0 Kg
CFM12SXXX-E 170pcs a box, including the total weight of package material about 9.0 Kg
